**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, 20 22, drawn to a method for attenuating expression of a target gene in a cell, classified in class 435, subclass 6.
- II. Claim 16 , drawn to a method for identifying nucleic acid sequences, classified in class 435, subclass 6.
- III. Claims 17-19, drawn to a method for conducting a drug discovery business, classified in class 434 subclass 107.
- IV. Claims 21, drawn to a hairpin nucleic acid, classified in class 536, subclass 22.1.
- V. Claim23-25, drawn to a transgenic animal, classified in class 800, subclass 3.

The inventions are distinct, each from the other because of the following reasons:

Inventions IV and I-III are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case nucleic acid of IV can be used in several different processes: The nucleic acid of group IV can be use

Art Unit: 1637

either for the method of group I, II or III. Further the method of group II is not required to practice the method of Group I and the method of group III is not required to practice the method of group II.

Inventions I-IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
